IIT Roorkee

Empowering the Next Generation

With our Skill Development Programs

iHUB DivyaSampark is dedicated to developing the skills and knowledge needed to thrive in the rapidly evolving technology landscape. Our programs are designed to equip students, faculties, working professionals, and entrepreneurs with cutting-edge skills in semiconductor and deep technologies, regardless of their geographical location.

MORE THAN 61,000+ LEARNERS ARE TRAINED

Specialized Training

- Courses in semiconductor, AI, ML, Data Science, IoT, Drone technology, Robotics, 5G
- Hands-on training with industry-standard tools and technologies.
- Tailored programs for students, working professionals, and faculties.

Academic Collaboration

- Partnering with universities and colleges to integrate deep tech education into their curricula.
- Supporting student and faculty development through training, resource sharing, and creating experience centers.
- Joint research projects to foster collaboration between academia and industry.

Advanced Technical Expertise:

- Certified Trainers skilled in deep technologies, semiconductor fabrication, design, testing, and problem-solving.
- Curriculum designed with industry leaders for future market needs with the help of industry and academic experts

Workshops & Seminars

- Regular events to stay updated on the latest trends and innovations in semiconductor and deep technologies.
- Expert-led sessions that provide insights into advanced technologies and research.
- Networking opportunities with industry leaders and experts.

Reaching Hilly and Remote Areas

- Inclusive Training Programs: Bridging the digital divide by reaching learners in hilly and remote regions.
- Physical and Online Training: Blending in-person and online sessions for comprehensive education, even in hard-to-reach areas.
- Empowering Local Talent: Collaborating with local institutions to build capacity and support sustainable growth.

Why Choose iHUB DivyaSampark?

- Semiconductor Expertise: Programs taught by industry-leading experts in semiconductor fields.
- Comprehensive Semiconductor Education: Gain the skills and knowledge needed to succeed in the semiconductor industry.
- Industry-Relevant Training: Programs designed to meet the needs of the current job market.
- Experienced Mentors: Learn from experts with extensive experience in CPS and semiconductor fields.
- Comprehensive Curriculum: Covering both foundational knowledge and advanced topics.
- Upskilling and Reskilling: Providing targeted opportunities to enhance current skills or acquire new ones.
